Ismail Ibrahim Front-End Developer

Ismailibrahim6268@gmail.com +201064196268 Cairo, Egypt Ismail-Ibrahim-i11 1IsmailIbrahim
IsmailIbrahim.tech Ismail Ibrahim Final Exemption

Detail-oriented Frontend Engineer specializing in architecting complex, data-heavy web applications. Leveraging a background in Computing and Data Science to deliver optimized, performant solutions using Next.js and TypeScript. Committed to writing maintainable, production-grade code and continuously expanding capabilities in full-stack development to build robust end-to-end solutions.

EXPERIENCE

Frontend Engineer, Hexifyer · Full-time — (Hybrid) December 2025 – Present | Cairo, Egypt
- Frontend Developer responsible for building scalable, high-performance user interfaces for complex web applications.
- Focused on optimizing data-heavy dashboards, advanced state management, and smooth user experiences.
- Worked closely with product and backend teams to deliver maintainable, production-ready frontend solutions.

Frontend Developer, GeekyAir · Full-time — (Hybrid) December 2024 – January 2026 | Alexandria, Egypt
- Engineered Next.js & React applications in TypeScript, managing dynamic data flows via complex forms and REST APIs.
- Built accessible user interfaces by orchestrating design systems like Tailwind CSS, Shadcn UI, and PrimeReact.

Frontend Developer, ComplyMarket · Part-time — (Remote) July 2024 – May 2025 | Munich, Germany
- Developed a full-stack platform using Next.js, TypeScript, and Tailwind CSS, with interactive dashboards and multi-step forms.
- Integrated secure APIs and structured the application using Next.js App Router and Redux Toolkit for a scalable codebase.

Internships Alexandria, Egypt
Bibliotheca Alexandrina – Contributed to web apps with HTML, CSS, JS (03/2023 – 05/2023)
AppSoft Co – Web design, performance, and load testing (07/2022 – 09/2022)

EDUCATION

Bachelor In Computers and Data Science, Alexandria University September 2019 – May 2023 | Alexandria, Egypt
CGPA: 3.25

PROJECTS

Polaris – SaaS Project Management & Team Collaboration Platform
- Built a scalable B2B SaaS project management platform supporting sprint planning, backlog management, and team collaboration on top of a shared authenticated application core.
- Engineered performant task management with drag-and-drop ranking using fractional indexing, and delivered a multi-tenant experience through shared infrastructure and application-level context.

DevStudio – Hybrid AI Estimator & Partner Delivery Platform
- Built a complex hybrid Next.js application combining public product funnels (AI estimation, partner onboarding) with an authenticated dashboard powered by a shared monorepo architecture.
- Engineered scalable frontend architecture using shared packages, custom hooks, and server-state orchestration to handle multi-step flows, session persistence, and seamless transition between public and authenticated experiences.

SkyPass Caribbean - SaaS Booking Management System, United States
- Designed a multi-tenant SaaS travel booking system using React, TypeScript, PrimeReact, and Tailwind CSS.
- Enabled customizable booking forms, rescheduling features, and agency management dashboards.

Compliance Management System, Munich, Germany
- Developed a scalable compliance platform with Next.js, TypeScript, Redux Toolkit, and Tailwind CSS.
- Integrated secure REST APIs and built reusable UI components with filtering, pagination, and export features.

Chat Roulette – Web3 Real-Time Chat Platform (Parley Interactive Demo)
- Architected a scalable Next.js and React frontend for a production Web3 browser application, orchestrating complex UI state across interactive matchmaking, digital wallets, and authenticated flows.
- Engineered race-safe long-polling matchmaking and seamless WebSocket state management, alongside in-app payment integrations and a role-gated admin console.

Kindred Portal – Full-Stack Employee Operations Platform, United States
- Built an internal employee portal with React and Redux, handling role-based access and secure file operations.
- Designed a responsive, role-aware interface for desktop and mobile users.

Palm Tree Management System, United States
- Developed a full-stack service system using React, Redux, and PrimeReact with integrated payments and invoice generation.
- Implemented SMS/email tracking and technician tools with map/media capture capabilities.

SKILLS

HTML | **CSS** | **Next.js** | **React** | **Redux toolkit** | **TanStack Query** | **Zustand** | **Zod** | **TypeScript** | **JavaScript**
REST APIs | **Axios** | **AJAX** | **Design Patterns** | **OOP** | **Monorepo Architecture** | **Shared Packages Logic** | **Figma**
Bootstrap | **Tailwind CSS** | **Material UI** | **PrimeReact** | **Headless UI** | **Chakra UI** | **Shadcn UI** | **Framer Motion**
